Series 100 Mini Bee™ Absolute and Differential Vacuum Switches

Accurate and reliable pressure detection

Absolute setpoint range between 20 to 970 Torr, relay energized when pressure drops below setpoint

Differential setpoint range between -99 to +46 Torr relative to atmosphere, relay energized when differential pressure setpoint reached

No maintenance required in clean applications

Easy installation with preset set points that can be field adjusted

Compact design

Robust corrosion resistant design, cleanroom compliant

VSM100 Mini Bee

The VSM100 *Mini Bee*™ is a cleanroom compliant all stainless steel corrosion resistant vacuum switch. It is a high-accuracy, temperature compensated sensor designed for accurate and reliable pressure detection in vacuum applications including pressure interlocks.

The *Mini Bee* is available in an absolute and differential configuration. The absolute switch has a full scale rating of 1000 Torr and the setpoint relay can be preset to any user specified value from 20 to 970 Torr. The differential switch setpoint can be preset set from 99 Torr below atmospheric pressure up to 46 Torr above atmosphere pressure.
